

All Our Kin Provider Showcase

It is challenging for families to find reliable, affordable, and high quality child care for their children. The Provider Showcase gives parents easy-to-understand information, all in one place, about local family child care options. Employees can worry less about finding child care for their children. **The Provider Showcase will help your employees find child care that works for them.**

Family Child Care Overview

Family child care providers are licensed by the State of Connecticut to provide care to children in a private home. Like center-based programs, licensed family child care programs are regulated by the Connecticut Office of Early Childhood. The Office checks each home for health and safety prior to licensure and makes unannounced visits to programs. Family child care offers a home-like setting and usually includes children from different ages, from infants and toddlers to preschoolers. Family child care providers may also care for school-age children before and after school hours.

Benefits to Employers

When employees have access to quality and reliable child care, both they and their employers see the benefits.

- Employees are less likely to be absent because of a lack of child care.
- Employees are less likely to be tardy and better able to concentrate on their work.
- There is less likely to be employee turnover resulting from lack of child care.

A study conducted by Cornell University found that the availability of high-quality child care decreased employee absences by 20–30% and reduced turnover by 37–60% (Ithaca: Cornell Cooperative Extension, December 2004).
